Office Action Summary	Examiner	Art Unit				
	David Buttner	1712				
The MAILING DATE of this communication appears on the cover sheet with the correspondence address Period for Reply						
A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.  - Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.  - If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.  - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.  - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Application/Control Number: 10/656,705

Art Unit: 1712

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-23 rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The "T" and "W" of claims 1 and 12 cannot be oxygen or nitrogen because these groups are not monovalent as in the formulas.

Claim 2's formula does not "fit" the formula of claim 1 because the endgroups are -OH and -NHR rather than oxygen or nitrogen.

Claim 18's prepolymer is said to be a polyurethane, yet "hetero"telechelic is defined by applicant to require different endgroups (page 2 line 5). Such a prepolymer would result in a urethane/urea hybrid (if endgroups are –OH and –NH2).

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States

Application/Control Number: 10/656,705

Art Unit: 1712

only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 18 and 20-23 rejected under 35 U.S.C. 102(e) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Rajagopalan 2004/0225100.

Rajagopalan suggests golf ball covers made from a polyahl/isocyanate prepolymer (paragraph 42). The polyahls may have both —OH and —NHR terminals (paragraph 16). The polydispersity of the polyahl is under 2.1 (paragraph 41). The golf ball can include an intermediate layer (paragraph 89).

Claims 18 and 20-23 rejected under 35 U.S.C. 102(e) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Rajagopalan 2004/0225102.

Rajagopalan suggests golf ball covers made from a polyahl/isocyanate prepolymer (paragraph 42). The polyahls may have both —OH and —NHR terminals (paragraph 16). The polydispersity of the polyahl is under 2.1 (paragraph 41). The golf ball can include an intermediate layer (paragraph 89).

Schwindeman '939 suggests applicant's preferred oligomer can be reacted with diisocyanates (col 16 line 28-34). However, these materials are not suggested for golf ball covers. Schwindeman only suggests these prepolymers in coating (ie paint) applications. Wu 2002/0004429 suggests golf ball covers from polybutadiene glycol and diisocyanates (paragraph 22), but makes no mention of polydispersity and would not be "hetero" (ie different endgroups on the oligomer).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to David Buttner whose telephone number is 571-272-1084. The examiner can normally be reached on weekdays from 10 to 5pm.

Application/Control Number: 10/656,705 Page 4

Art Unit: 1712

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Randy Gulakowski, can be reached on 571-272-1302. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
